

# UPLIFT DESK®

## ADVANCED WIRE MANAGEMENT KIT

Developed in-house after years of desk installations, the advanced wire management kit is a complete cable organization system for your height-adjustable desk. It includes the items pictured here.

**1 Wire Tray:** Designed to be mounted to the underside back edge of your desktop, the wire tray is a convenient place to store all of your cables, keeping your desk area neat and organized. It is 24" long and 3.6" in diameter. Can also be ordered by itself.

**2 Surge Protector:** Plug all your accessories into this power strip and store it inside the under-desk wire management tray. That way, the only cord coming from your desk to the wall will be from the Surge protector, and your accessories will move up and down with your desk. Cord is 15 feet long.

**3 Cable organizer:** Features a heavy-duty spiral design that conceals and protects cords, keeping them in a single bundle.

**4 Wire funnel:** Allows for easy addition and removal of cords from the desk-to-wall cable organizer.

**5 Adhesive cable mounts:** Re-adjustable ties allow for easy, customizable management of wires under your desk. Ties can be opened or closed for adding or removing wires.

If you prefer to purchase just the under-desk Wire Tray, it is available individually.
