

Keyboard Trays by UPLIFT Desk

Large Keyboard Tray

If you are looking for a keyboard tray that outshines all of the competition, look no further than the Large Keyboard Tray. The sturdy, phenolic platform will support typing and mousing without flinching. Plus, the tray features easy adjustments such as a quick and easy lift-and-release height adjustment mechanism that will go above or below your desk, wheel tilt adjustment with an easy-read indicator, and 360 degrees of rotation to allow you to adjust it to meet your needs. The Large Keyboard Tray is built to last and will support your wrists for years to come. This tray is also available in a bamboo version.

Switch Keyboard Tray

The Switch Keyboard Tray combines a smaller keyboard platform with a separate, ambidextrous mousing platform. This compact tray shares the great ergonomic adjustment features of the Large Keyboard Tray: lift-and-release height adjustment both above and below your desk, wheel tilt adjustment, and 360 degrees of rotation. Although the platform is smaller, the Switch Keyboard Tray is big on ergonomics and still packs a punch.

E3 Keyboard Tray

The E3 Keyboard Tray is a good choice to add ergonomics to your desk on a budget. This lightweight keyboard tray features a large platform with a subtle curve to bring the task of typing closer to your body. Unlock a lever to adjust the height (below desk only) and tilt of your keyboard tray. For a cost-conscious choice, the E3 Keyboard Tray will ease the pain of poorly aligned keyboard typing.
