

# Monitor Arms by UPLIFT Desk

## UPLIFT Monitor Arm

The UPLIFT Monitor Arm is a pneumatic arm that provides complete fingertip adjustment for height, depth, and lateral movement with an adjustable counterbalance system. This arm is available in both single and dual versions, and allows for the addition of a laptop mount. See the chart below for more information.

## View Monitor Arm

The UPLIFT View Monitor Arm also comes in single and dual monitor options to keep your display at the perfect height. With integrated cable management, a generous weight range, and two built-in USB ports located conveniently in the base, the View is an all-in-one monitor mounting solution. This arm also allows for the addition of a laptop mount. See the chart below for more information.

## Horizon Monitor Arm

The UPLIFT Horizon Monitor Arm provides pneumatic height adjustments via a built-in gas cylinder located in the arm. Enjoy the freedom to rotate, tilt, pan, and adjust to your most comfortable working levels with the touch of a finger. With the dual monitor option, you can position your screens independently of each other and route cords within its cable management system. See the chart below for more information.
