(M4x12; qty 8)

VESA screw  
(qty 2)

Allen wrench

You'll need to get these from your UDA115 package:

Pan head screws  
(M6x14; qty 2)

This manual was designed to use after initial assembly of your E7 Electric Standing Desk Converter. This kit contains the items necessary to mount two monitors on the converter's lifting column.

### Step 1

On the Mounting bracket, place the locking bar on top of the VESA bracket so the holes are aligned as shown. Insert two (2) M6x14 Pan head screws and two (2) Washers into both holes. Using the Allen wrench, tighten the screws, leaving them a little bit loose.

### Step 2

Attach the Mounting bracket assembly to the E7's Lifting column using the two (2) M6x14 Pan head screws provided in the E7's assembly kit.

**Note:** There are five (5) different height settings. Choose the height that is best suited for your monitors.

### Step 3

Attach the VESA mounts to your monitors using four (4) M4x12 Pan head screws for each monitor. Ensure that the hooks on the VESA mount are facing down and toward the bottom of the monitor, as shown.

**Note:** Maximum monitor size 28"

(monitors not pictured, to illustrate connecting the mount to the bracket.)

### Step 4

Hook monitor assemblies onto the VESA brackets, and secure each side with one (1) VESA screw.

Slide the loosened VESA brackets to the spot where you plan to keep your monitor. Smaller monitors can be moved toward the center of the Mounting bracket, while larger monitors should slide further to the outer sides of the unit. Once in place, tighten the screws down completely with the Allen wrench.

## ⚠ CAUTIONS & WARNINGS

- ⚠ **CAUTION:** Read all instructions before assembly. Failure to assemble properly may result in damage or personal injury.
- ⚠ **CAUTION:** Make sure that the wires for your monitor and devices have enough slack to prevent your devices from being pulled off the unit workstation when raising the unit.
