UPLIFT V2

Introducing the most advanced height adjustable standing frame: the UPLIFT V2 Standing Desk Frame. We've taken our most popular desk frame and increased its safety, improved its stability, and added multiple features.

UPLIFT V2-Commercial

We created the UPLIFT V2-Commercial Standing Desk Frame to provide a seated and standing height range that's ergonomically suitable for 95% of office workers. This frame (with a 1" thick desktop) meets the ANSI/BIFMA G1-2013 height standard required by many of the world's largest companies, which accommodates users from 5' tall seated to 6'3" tall standing.

Similarities

355-Lb Lifting Capacity

Enough lifting power to handle even the larger desk setups

Contract-Grade Quality

Designed for commercial-level use and constructed from highly durable materials

Improved Stability

We tightened the tolerance between the three telescoping stages of the legs for a more precise fit

3-Stage Legs

Our legs are 33% faster and have a 33% greater height range than competitors' 2-stage frames

Dual Motor Design

Stronger, more reliable, & quieter

Whisper-Quiet

Adjusts quietly at a peaceful 50 dB

Superior Anti-Collision Sensitivity

Superior anti-collision technology quickly detects light resistance if objects or people are in the desk's path, and stop the frame's motion to help prevent accidents or injuries

48 Accessory Mounting Points

These functional additions allow you to connect new and upcoming desk-enhancing accessories to your UPLIFT frame. The 48 mounting points are patent pending and unique to UPLIFT Desk

41.3"-72.2" Width Adjustment

Frame expands to fit our 42"-80" desktop sizes

Available in 4 Color Options

Color options include black, white, gray, & industrial style

Included Under-Desk Wire Management

Meets BIFMA X5.5-2014 Durability Standard¹

1. This BIFMA X5.5-2014 Standard tests the durability of the desk (desk loading, stability, racking, leg strength, vertical adjustment, cycle testing, etc.). This standard specifies acceptance levels to help ensure reasonable safety and performance.

Differences

UPLIFT V2

25.3"-50.9" Height Range

This range includes a 1" desktop. The total travel distance is 25.6"

Stability Brace

Steel reinforcements are tucked under the desktop and eliminate side-to-side wobble. Stability braces remove the need for a lower crossbar, leave more room for accessories, and create a clean, streamlined look

Inverted Leg Orientation

Inverted leg orientation allows us to weld stability braces to both sides. This gives your desk optimal stability without the need for a stability crossbar

For a more in-depth look at the similarities and differences between the frames, [watch our video!](#)

UPLIFT V2-Commercial

22.6"-48.7" Height Range

This range includes a 1" desktop, meeting the ANSI/BIFMA height requirement. Total travel distance is 26.1"

Stability Crossbar

We included a stability crossbar to support this lower-height-range frame, which lets you work at higher heights without your desk wobbling

Thicker Legs

These legs have a 35% larger cross-sectional area to improve stability (90 mm x 60 mm vs 80 mm x 50 mm)

Meets ANSI/BIFMA G1-2013 Height Standard²

2. Ideal for office spaces that choose ANSI/BIFMA G1-2013 compliance, this frame accommodates the widest range of potential employees, adjusts 2" lower than standard frames, and is a solution for users who are very petite or very tall (within a 5' to 6'3" height range). Please note that compliance with ANSI/BIFMA G1-2013 requires the use of a 1" desktop.

UPLIFT V2 Frame

Introducing the UPLIFT V2

We've taken our most popular desk frame and improved its stability, increased its safety, and added a number of innovative features. Engineered for quick, reliable height adjustment, the reinforced UPLIFT V2 Frame includes two separate motors and an inverted leg design, which keeps the desk sturdy at its highest height. Attach accessories quickly using the frame's patent-pending mounting point system. And choose between white, gray, black, and industrial style finishes for the perfect look.

UPLIFT V2-Commercial Frame

One Size Fits All

Our UPLIFT V2-Commercial Standing Desk is designed to fit a wide range of users, and meet the ANSI/BIFMA G1-2013 height requirement standard (when used with a 1" thick desktop). This makes our desk suitable for most users, accommodating a seated 5th percentile (5'0") to a standing 95th percentile (6'3").
