UPLIFT V2
Introducing the most advanced height adjustable standing frame: the UPLIFT V2 Standing Desk Frame. We've taken our most popular desk frame and increased its safety, improved its stability, and added multiple features.

UPLIFT V2-Commercial
We created the UPLIFT V2-Commercial Standing Desk Frame to provide a seated and standing height range that's ergonomically suitable for 95% of office workers. This frame (with a 1" thick desktop) meets the ANSI/BIFMA G1-2013 height standard required by many of the world's largest companies, which accommodates users from 5' tall seated to 6'3" tall standing.
# 355-Lb Lifting Capacity
- Enough lifting power to handle even the larger desk setups

# Contract-Grade Quality
- Designed for commercial-level use and constructed from highly durable materials

# Improved Stability
- We tightened the tolerance between the three telescoping stages of the legs for a more precise fit

# Superior Anti-Collision Sensitivity
- Superior anti-collision technology quickly detects light resistance if objects or people are in the desk’s path, and stop the frame’s motion to help prevent accidents or injuries

# Dual Motor Design
- Stronger, more reliable, & quieter

# Inverted Leg Orientation
- Inverted leg orientation allows us to weld stability braces to both sides. This gives your desk optimal stability without the need for a stability crossbar

# Improved Stability
- Steel reinforcements are tucked under the desktop and eliminate side-to-side wobble. Stability braces remove the need for a lower crossbar, leave more room for accessories, and create a clean, streamlined look

# Stability Brace
- Steel reinforcements are tucked under the desktop and eliminate side-to-side wobble. Stability braces remove the need for a lower crossbar, leave more room for accessories, and create a clean, streamlined look

# Thicker Legs
- These legs have a 35% larger cross-sectional area to improve stability (90 mm x 60 mm vs 80 mm x 50 mm)

---

**Similarities**

- **355-Lb Lifting Capacity**: Enough lifting power to handle even the larger desk setups
- **Contract-Grade Quality**: Designed for commercial-level use and constructed from highly durable materials
- **Improved Stability**: We tightened the tolerance between the three telescoping stages of the legs for a more precise fit
- **Dual Motor Design**: Stronger, more reliable, & quieter
- **Inverted Leg Orientation**: Inverted leg orientation allows us to weld stability braces to both sides. This gives your desk optimal stability without the need for a stability crossbar
- **Improved Stability**: Steel reinforcements are tucked under the desktop and eliminate side-to-side wobble. Stability braces remove the need for a lower crossbar, leave more room for accessories, and create a clean, streamlined look

**Differences**

- **25.5”-51.1” Height Range**: This range includes a 1” desktop. The total travel distance is 25.6”
- **22.6”-48.7” Height Range**: This range includes a 1” desktop, meeting the ANSI/BIFMA height requirement. Total travel distance is 26.1”
- **Whisper-Quiet**: Adjusts quietly at a peaceful 50 dB
- **Available in 4 Color Options**: Color options include black, white, gray, & metallic (industrial style)
- **Included Under-Desk Wire Management**
- **Meets ANSI/BIFMA G1-2013 Height Standard**: Ideal for office spaces that choose ANSI/BIFMA G1-2013 compliance, this frame accommodates the widest range of potential employees, adjusts 2” lower than standard frames, and is a solution for users who are very petite or very tall (within a 5’ to 6’3” height range). Please note that compliance with ANSI/BIFMA G1-2013 requires the use of a 1” desktop.

---

1. This BIFMA X5.5-2014 Standard tests the durability of the desk (desk loading, stability, racking, leg strength, vertical adjustment, cycle testing, etc.). This standard specifies acceptance levels to help ensure reasonable safety and performance.

2. Ideal for office spaces that choose ANSI/BIFMA G1-2013 compliance, this frame accommodates the widest range of potential employees, adjusts 2” lower than standard frames, and is a solution for users who are very petite or very tall (within a 5’ to 6’3” height range). Please note that compliance with ANSI/BIFMA G1-2013 requires the use of a 1” desktop.
Introducing the UPLIFT V2

We’ve taken our most popular desk frame and improved its stability, increased its safety, and added a number of innovative features. Engineered for quick, reliable height adjustment, the reinforced UPLIFT V2 Frame includes two separate motors and an inverted leg design, which keeps the desk sturdy at its highest height. Attach accessories quickly using the frame’s patent-pending mounting point system. And choose between white, gray, black, and metallic (industrial style) finishes for the perfect look.
One Size Fits All

Our UPLIFT V2-Commercial Standing Desk is designed to fit a wide range of users, and meet the ANSI/BIFMA G1-2013 height requirement standard (when used with a 1” thick desktop). This makes our desk suitable for most users, accommodating a seated 5th percentile (5’0”) to a standing 95th percentile (6’3”).
